

A photograph of a modern, two-story white house. The house features a dark grey or black door with a rectangular window and a matching handle. Above the door is a white horizontal band. To the left of the door is a window with dark shutters. The house is surrounded by greenery, including a tree with yellow leaves on the left and a green bush on the right. The ground is paved with light-colored bricks.

Well-protected during day and night,
so that our beautiful dreams
stay with us.

The use of toughened glass for the outside and inside
pane reduces the risk of breaking glass for panels with
glass inserts.

Therefore, double-sided attachment panels, our pre-
mium product, are generally supplied with toughened
glass. If you need additional burglary protection, we re-
commend ordering the pane in the middle as a P4A (A3)
version (triple safety glazing).

FOR YOUR SAFETY
TOUGHENED GLAZING
INSIDE AND OUTSIDE

P4A – The option
